

Model DF2410 Control Valves

Technical Sales Bulletin

Figure 1 DF2410 Control Valve

The Model DF2410 Control Valve is a rugged globe style control valve intended for demanding applications in process control. It is suitable for a wide range of applications, especially high pressure and severe service. The compact design makes installation and maintenance more convenient than traditional valve and actuator assemblies while still offering the same functionality. The Model DF2410 is designed to accept instrumentation requiring valve stem linkages making it an excellent control valve.

Incorporated into the design are features that assure easy and safe maintenance. Maintenance can be performed with the valve body in line.

The Dyna-Flo DF2410 control valve is manufactured to a high level of quality to ensure superior performance and customer satisfaction.

Features

NACE Service Ready

Standard construction for the DF2410 control valve features NACE trim. The valve bonnet and body also conform to NACE MR075 (National Association of Corrosion Engineers) recommendations.

Live Loaded Packing

Packing for the DF2410 control valve is designed to provide a quality stem seal and to prevent the loss of hazardous gases or fluids. The live loaded feature provides for reduced maintenance and positive sealing in temperature and pressure cycling conditions.

Easy Trim Changes

Bonnet and actuator removal is easily accomplished by loosening the hammer nut. Unique plug with quick-lock pin allows for easy removal and replacement without the need for punches and hammers. The seat ring is removed using the same tool as the corresponding size DF2000. The hammer nut allows for easy bonnet removal and access while the valve is still in line.

Simple Installation

The DF2410 control valves compact design allows for easy installation in tight areas where space is limited.

Low Temperature Materials

The DF2410 valve and actuator are constructed with materials that are capable of functioning in temperatures of -40°C (-40°F).

Compact Design

The DF2410 control valve is light weight for easy installation and handling. DF2410 control valves compact design makes it ideal for tight fitting applications.

Model DF2410 Control Valves

Technical Sales Bulletin

SPECIFICATIONS

Port Diameters

1/4", 3/8", 1/2", 3/4", 1", and 1-1/4"

Refer to Table 1.

Sizes and Connection Styles

Size: 2 inch

Rating: ASME 150 / 300 / 600 / 900 / 1500

NPT: 2,250 Psi (15,513 kPa) CWP

Connections: NPT / RF / RTJ

Refer to Table 1 for details and Port Diameters.

Maximum Inlet Temperatures and Pressures

Flanged valves consistent with ASME Class rating as per ASME B16.34, unless limited by either material pressure or temperature limitations.

Maximum Pressure Drops

Refer to Tables 10, 11, 12 & 13.

Standard Shut-off Classifications

Class IV Shut-off in accordance with ASME / FCI 70.2.

Dimensions

Fail Closed Valve Configuration Dimensions

Refer to Figure 4.

Fail Open Valve Configuration Dimensions

Refer to Figure 5.

Flow Characteristics

Equal Percentage.

Flow Direction

Preferred Up (Refer to Tables 6 & 7).

Valve Plug Travel

3/4 inch (19 mm).

Approximate Valve Body and Actuator Weights

Refer to Table 1.

Material Temperature Capabilities

Body Assembly

-46 to 150°C (-50 to 300°F)

Actuator Assembly

-40 to 82°C (-40 to 180°F)

Body Style

Available in Globe style.

Bonnet/Body Connection

Threaded Hammer Nut.

Actuator Configuration

The DF2410 utilizes a spring and diaphragm actuator suitable for modulating. Available in either Fail Open or Fail Closed configurations, actuator fail position is not field reversible.

Maximum Actuator Casing Pressure

50 Psig (345 kPag).

Effective Actuator Diaphragm Area

69 inches² (452 cm²).

Actuator Pressure Connections

NPS 1/4 inch NPT.

Valve Sizing Coefficients

Refer to Table 2.

For more information and other options contact your Dyna-Flo sales office.
